WE CAN HELP YOU ACHIEVE WATER SUSTAINABILITY!

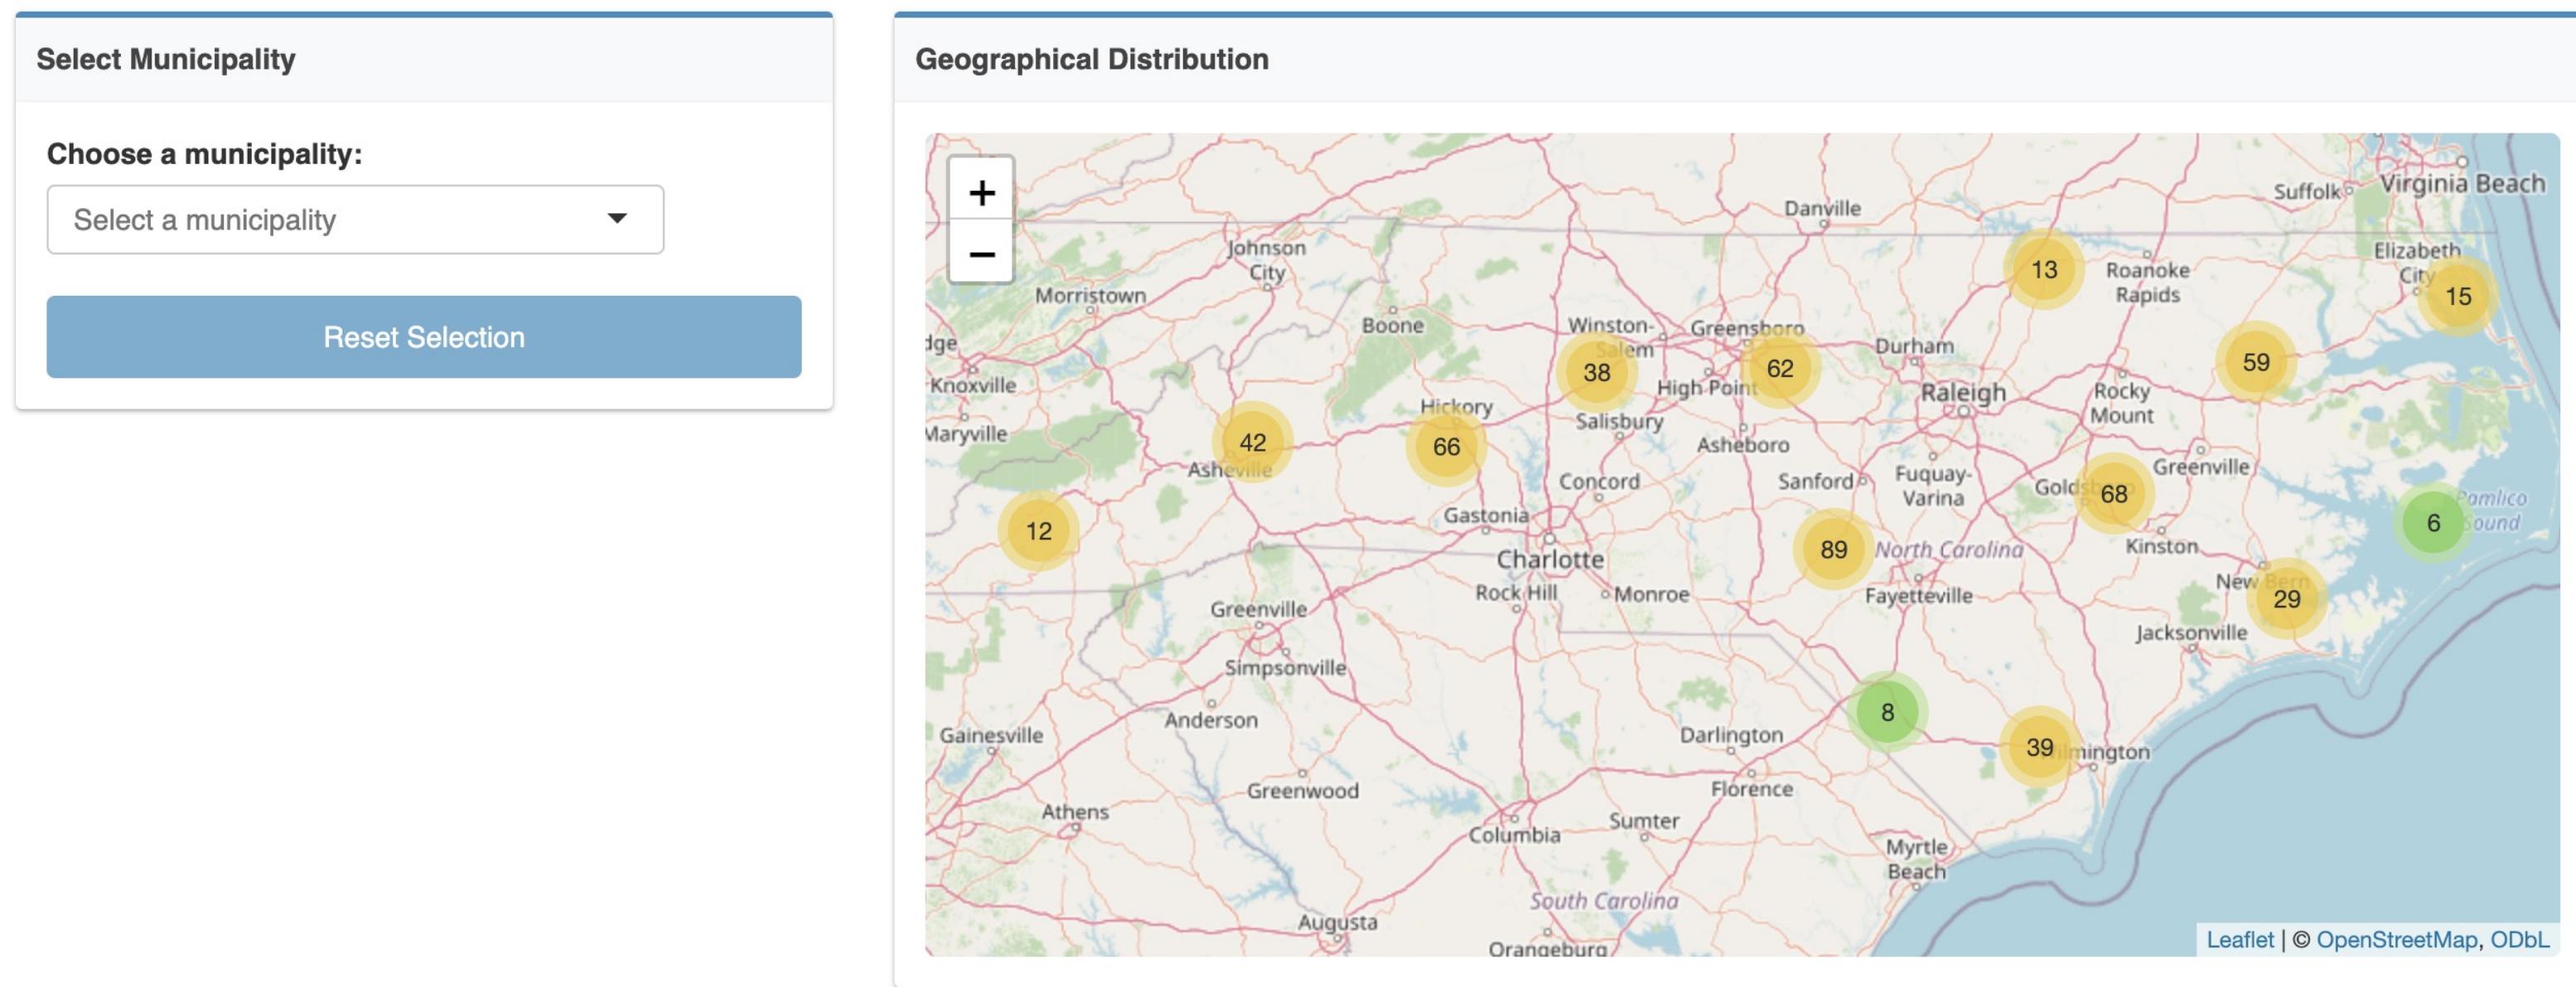

DASHBOARD OVERVIEW

Welcome to the Water and Wastewater Affordability Assessment Tool Dashboard. This tool helps utility managers evaluate the impact of water rates on customers across different income levels. Features include:

1. Easy input of location and rates
2. Display of key community economic indicators
3. Comparison of rate impacts on various income groups

Explore now to develop equitable water pricing policies that balance financial sustainability with community affordability.

Resources on Affordability Metrics

- ▶ Percent MHI as an Indicator of Affordability of Residential Rates: Using the U.S. Census Bureau's Median Household Income Data
- ▶ The Increasing Need to Address Customer Affordability
- ▶ Understanding the Financial Position of Households Using the American Community Survey

"Our mission is to help deliver sustainable, fair, and effective environmental programs and services."
